gayathriravinderreddy@gmail.com ◇ [LinkedIn](#) ◇ [GitHub](#)

PROFESSIONAL SUMMARY

Strong foundation in Python, SQL, Machine Learning, and Data Analysis with hands-on experience in predictive modeling, data preprocessing, and visualization using Scikit-learn, Pandas, NumPy, and Matplotlib. Seeking an entry-level AI, Machine Learning, or Data Science role.

EDUCATION

Bachelor of Technology (Information Technology)

Malla Reddy Engineering College

2024–2027

CGPA: 8.45/10

Diploma in Electronics and Communication Engineering

KITS Engineering College for Women

2021–2024

CGPA: 9.3/10

TECHNICAL SKILLS

Languages: Python, SQL, Java

ML & Data Science: Scikit-learn, Pandas, NumPy, Matplotlib, Data Preprocessing, EDA, Feature Engineering

Databases & Tools: MySQL, MongoDB, Git, GitHub, Jupyter Notebook, VS Code

Core Subjects: DSA, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Software Engineer Intern

Yuga Yatra Retail Pvt. Ltd.

Dec 2025 – Feb 2026

Remote

- Developed responsive web application features using HTML, CSS, JavaScript, improving user experience across desktop and mobile devices.
- Collaborated in software development, testing, debugging, and feature enhancement following software development best practices.
- Utilized Git and GitHub for version control, code management, and team collaboration.

PROJECTS

Thyroid Disease Detection using Machine Learning

Python, Scikit-learn, Pandas, NumPy

sep 2025 – Oct 2025

- Developed a machine learning model for thyroid disease prediction using Random Forest, SVM, and Naive Bayes algorithms.
- Performed data cleaning, preprocessing, feature selection, and hyperparameter tuning to improve model performance.
- Achieved **92% classification accuracy** using the Random Forest algorithm and evaluated models using cross-validation.

Real Estate Price Analyzer

Python, Pandas, NumPy, Scikit-learn, Matplotlib

Oct 2024 – Dec 2024

- Built a regression model for predicting real estate prices using Python and Scikit-learn.
- Performed data cleaning, feature engineering, exploratory data analysis (EDA), and predictive modeling on housing datasets.
- Improved prediction performance through hyperparameter tuning and visualized price trends using Matplotlib.

Birth Rate Analysis System

Python, Pandas, NumPy, Matplotlib

Jan 2026 – Apr 2025

- Analyzed birth rate datasets using Python, Pandas, and NumPy to identify demographic trends and patterns.
- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) to improve data quality.
- Developed interactive visualizations using Matplotlib to compare birth rates across regions and support data-driven insights.

CERTIFICATIONS

- Microsoft - Azure AI Fundamentals
- Deloitte - GenAI Powered Data Analytics Job Simulation
- Cisco - Data Analytics Essentials
- AI & Cloud Technology – AICTE Edunet Foundation
- Cloud Computing – NPTEL
